SPECIAL PROJECT INFORMATION SHEET

Project Description	Handtorque HT 30 / 25 with special quick release lifting assembly.		
Date created	24 November 2014	Project Number	Q3176

## INTRODUCTION & APPLICATION

Power generation application for a 3,000 N.m torque multiplier, fitted with a lifting bracket that allows the tool to swivel when attached to a hoist and that can be easily detached.

## SOLUTION

Handtorque HT 30 / 25 with special stepped annulus fitted with special lifting bracket assembly.

## TECHNICAL SPECIFICATION / DATA HIGHLIGHTS

The lifting ring is free to rotate through 360° around the special stepped HT annulus.  
The lifting bracket is attached to the lifting ring via two quick release pins.  
Retains standard features of HT30 # 18006, i.e. 25:1 torque multiplication with anti-wind-up ratchet, 0.5" female square input drive, 1" male square output drive & 3,000 N.m maximum output torque.
